✨ Features

👨‍💼 Admin Features

- ☑ **Create Tasks** - Assign tasks to employees with title, description, due date
- ☑ **View All Tasks** - Dashboard with all tasks in organized grid layout
- ☑ **Task Management** - Track task status (New, Active, Completed, Failed)
- ☑ **Employee Management** - Assign tasks to specific employees
- ☑ **Real-time Updates** - Instant UI updates using Context API

👨‍💻 Employee Features

- ☑ **View Assigned Tasks** - See only tasks assigned to logged-in employee
- ☑ **Task Status Overview** - Visual cards showing task counts by status
- ☑ **Update Task Status** - Change task status (New → Active → Completed/Failed)
- ☑ **Task Details** - View complete task information including deadlines
- ☑ **Responsive Dashboard** - Works seamlessly on mobile, tablet, and desktop

🔐 Authentication & Security

- ☑ **Role-based Authentication** - Separate login for Admin and Employees
- ☑ **Protected Routes** - Unauthorized access prevention
- ☑ **Session Persistence** - Login state maintained using localStorage
- ☑ **Secure Logout** - Clean session termination

🎨 UI/UX Features

- ☑ **Responsive Design** - Mobile-first approach with Tailwind CSS
- ☑ **Dark Theme** - Modern dark mode interface
- ☑ **Loading States** - Visual feedback for async operations
- ☑ **Error Handling** - User-friendly error messages
- ☑ **Smooth Animations** - Enhanced user experience with transitions

---

🛠 Tech Stack

Frontend

- **React.js 18** - UI library
- **React Router v6** - Client-side routing
- **Context API** - State management
- **Tailwind CSS** - Utility-first CSS framework
- **Vite** - Build tool and dev server

Data Management

- **localStorage** - Client-side data persistence
- **Context API** - Global state management
